Emerson Network Power, a business of Emerson, a global company that leads by applying unique combination of industry expertise, technology, and resources to make the future of our customers’ enterprises and networks possible.

Emerson Network Power’s broad technology base and global expertise support a full spectrum of enterprise wide solution for today’s business need. We have been providing tailored solutions for protecting the operation of critical electronic systems in virtually every business segment right from customer premise equipment to global network.

**We are Emerson**

**Emerson. Consider It Solved.**

Customers call on Emerson when the stakes are the highest. Why? Because they know that we bring them technology and engineering to create solutions for their success. Whatever their challenge, they know that with Emerson by their side, they can “Consider It Solved.”

Supported by our right combination of knowledge, experience, product selection and service capability. We are the true solution provider of our customer’s IT infrastructure, right from grid to chip level.

When the stakes are high, partner with Emerson Network Power to optimize your technology with “high-nines” reliability solutions specific to your infrastructure.
The Liebert Hipulse-U offers a reliable, scalable and user-friendly solution to ensure availability of various types of networks. The Liebert Hipulse-U offers protection to your investment, and provide lower cost of ownership through its digital architecture and range of options which you can customize specifically for your needs.

**Information Technology**
- Large internet Data centers
- Colocation facilities
- Server farms
- Internet Service Providers

**Telecommunication**
- Mobile (3G, 4G)
- Fixed (including WLL)
- MSC, BSC centers

**Industrial Automation**
- Process control equipments
- Motion (digital drives and robotics)
- Transport Automation
- Airport automation and flight booking
- Railways and Road transport automation and ticket booking

**Corporate Parks**
- Banking, Insurance and Financial Services.
- Credit card operation
- Stock exchange operation
- Software Development Houses/Software Technology Parks
- BPO / KPO/EPO operation

**Building Automation**
- Access Control
- Security System
- Fire Alarm System

**Medical Diagnostics**
- Magneto Resonant Imaging
- CT Scanning
- Cath Lab
- Multiple medical imaging units

**Satellite**
- Uplinking
- Earth Stations
- Broadcasting & Entertainment
We have studied the emerging needs of our customers and have engineered what we have learned into the new, upgraded Liebert® Hipulse-U. Now it offers you more value and power per square meter. You will find that the Liebert® Hipulse-U offers unique features that address the needs of you business today and is designed to handle the needs that are expected in the future.

**Features To Protect Your Network**

- Fully Digital, twin DSP controlled
- Rated at 0.9 output power factor to deliver more active power
- Handle leading power factor loads without KW derating under specified conditions
- On-Line Double Conversion IGBT-based PWM Inverter
- Wide input voltage tolerance (+20/-20%)
- Wide input frequency range of 45Hz to 65Hz
- High overload capability of static bypass (14 times for 10 milliseconds and 10 times for 100 milliseconds)
- Capability to handle:
  - High crest factor loads
  - 100% non-linear loads
  - 100% unbalanced loads
- Built-in maintenance bypass
- Front access for spares replacement and preventive maintenance
- Easy Dual bus configuration architecture
- Adjustable frequency synchronization window up to 6% in the static bypass
- Provision of automatic battery circuit breaker instead of using conventional isolator in the PC path
- Field protocols ModBus / Jbus
- Network protocols SNMP
- Overload capability of the UPS:
  - 110% full load for 60 minutes
  - 125% full load for 10 minutes
  - 150% full load for 1 minute
- Easy Scalability without centralised Main Static Switch (MSS)
- Compact footprint

**Built Investment Protection**

- Automatic battery testing
- Field settablity of EOD of the battery
- Selectable times for boost charging duration of the battery (15 steps with each step of 1 hour)
- Protection against deep discharge of battery
- Battery circuit breaker instead of using AC isolator
- Short-circuit proof inverter
- Back-feed protection
- D-level lightning protection
- With 3 auxiliary power supply to ensure redundancy under any condition
- Standard dry contacts
- Choice between 6 or 12 pulse rectifier for 120kVA to 500kVA capacity range
- Choice of array of input harmonic filter options
- Compatible with Liebert® Active Harmonic Filter
- Temperature-compensated battery charging (optional)
Selected Configurations

Hipulse U is scalable to maximum 6 units using any of the following configurations to achieve either scalability or redundancy of desired percentage.

1+N Configuration with Distributed bypass System
- Up to six units in parallel
- 1+N configuration without any kind of centralized static switch
- Augment the system reliability
- Increase the availability of quality power following the load demand even if it was not forecasted or planned at the beginning of the project: ease of techno-economic expandability
- Enhanced the maintainability
- The total load is less than or equal to the rating of the single UPS (depending on the desired redundancy level) and is shared between all units

Hot Stand-by Configuration
- Feed one (Priority) or two (Priority and Normal load banks depending on the application need
- Increase the reliability of the priority load
- Enhanced the maintainability
- Easy connection
- Can be implemented in the existing installation regardless of the UPS size, manufacturer & its control.

Dual Bus System with Liebert® LTS, STS2 or Hiswitch2
- Provide supply to the loads from two independent power sources
- The two sources may be different in terms of power rating and redundancy
- Synchronizes the output of two independent bus
- Automatic transfer of the load between the two sources in case of fault using Liebert® LTS
- Increase dramatically the maintainability and reliability
Power Communication Options
When choosing the best system to protect your mission critical applications, an important consideration would be the software and communication options. As part of our commitment to provide the best solution for you, we offer a wide range of sophisticated software and communication options for Hipulse-U.

The most extensive list of optional communication solutions for Hipulse-U UPS Systems!
- Control through Building Management Systems via Modbus and Jbus protocols
- Web-enabled Monitoring and Management through SNMP protocols
- Network Management Systems ready (HP OpenView, CA Unicenter, Novell Managewise, etc)
- Software Solutions
  - Site Monitor Software
  - Facility wide monitoring by SiteScan
  - Shutdown software for your computer equipment
- Simultaneous monitoring for your computer equipment
- Emerson Power Quality Monitoring solutions

Liebert Hipulse U Accessories
- Intelligent Paralleling
  - Intended to increase system efficiency and to reduce the operating hours on the UPS
  - This feature will put one or more paralleled units into standby operation when number of redundant modules is above the user-specified threshold
- Liebert Active Filter
  - Optional super filter to reduce THDi to <5% and improve input PF up to 0.93 without additional system footprint.
  - Wide range of solution specially designed for handling current harmonic on bypass at different stages
- Isolation Transformer
  - Additional transformer for output or bypass supply depending on application
- Rectifier or Bypass supply
  - This allows UPS to be configured in Single or Dual Main supply to ensure system adaptability and reliability
- Protection Degree (IP) For Hipulse Enclosure
  - To address stressed environmental conditions, UPS with higher than IP 20 degree of protection can be made available for most of the kVA ratings of the Hipulse-U
- DC Ground Fault Indications
  - This provides indication of occurrence of battery ground fault problems
- Top Cable Entry
  - Available for a wide range of our Hipulse-U ratings
- Load Bus Synchronisation (LBS)
  - Ensures the synchronisation of outputs of two independent UPS systems to form Dual Bus Architecture for High availability of Critical BUS
- Liebert LTS, STS2 or Hiswitch2
  - This allows critical load to be transferred between two independent, synchronized AC power sources without any risk of load disturbances
  - This allows automatic transfer of load between the two sources
- TVSS (Transient Voltage Surge Suppressor)
  - This offers protection from damaging transients and electrical line noises
  - This is normally connected at the bypass path of Hipulse or inside the Static Transfer Switch as an optional item
SUPPORT

Maximizing the performance and efficiency of your data center’s uninterruptible power supply (UPS) and other power distribution systems requires they be properly maintained by factory-trained technicians.

Emerson Network Power, Liebert® Services has the only service organization in the world that has been factory trained on Liebert power equipment and is continuously supported and updated by the engineers who built the equipment.

Our Customer Engineers have a better knowledge of how to maintain Liebert equipment and integrate it into the overall data center infrastructure support strategy than any service provider.

The Emerson Difference

Many Services organizations can perform basic repair activities and maintain equipment at the same level of competency, but Emerson Network Power services can take your critical maintenance to the next level - proactive maintenance that can significantly extend the life of you power systems.

Emerson Network Power, Liebert Services

**Industry Experience**
As long as data centers have existed, Liebert Services has been supporting data center infrastructure and providing integrated services for mission-critical environments.

**System Wide Expertise**
Nobody understands Liebert power equipment, precision cooling units and electrical infrastructure better than the experts at Liebert Services.

**Technical Expertise**
Our knowledge of systems and how they integrate into your overall facility makes us uniquely qualified to apply the latest technology and best practices to your power, precision cooling, and battery systems.

**Unparalleled Responsiveness**
With Liebert Services, you have 24/7 access to a network of data center infrastructure specialists armed with the knowledge and parts to resolve your problems. Anytime. Anywhere.

**Fast, Efficient Problem Resolution**
Only Liebert Services offers the right combination of industry, system, and technical expertise along with the extensive resources necessary to identify and understand any data center need and provide proactive solutions.

#### Input

- **Voltage:** 380 / 400 / 415 Vac 4-wire plus ground
- **Input voltage range:** 290 to 508 Vac
- **Frequency:** 50Hz / 60Hz
- **Input frequency range:** ±4 to ±6 Hz
- **Input Current Distortion with linear load (with filter):** 3 to 10% with optional filter
- **Power Factor (with filter):** 0.88 to 0.97 with optional filter

#### Output

- **Voltage:** 380 / 400 / 415 Vac 4-wire plus ground

#### Frequency

- **Voltage Stability**
  - Steady state: ±1%
  - Transient state: ±5%
- **Transient recovery time:** 20 milliseconds (max)

#### Frequency Stability

- **Synchronized with internal clock:** ±0.1%
- **Synchronized with bypass:** ±5% (max)

#### Overload Capability
