

六、Color Ingredients

Titanium dioxide	AV-01 food / drug grade titanium dioxide	Precolor
emollient、 wax	<p>Dermol 99 — Isononyl isononanoate, highly branched low molecular weight dry and silky ester that exhibits unique characteristics, nick name “silk oil”</p> <p>Citmol 316 — Triisocetyl citrate, excellent pigment binder and spreader, super moisturizing, suggests its use in lipsticks</p> <p>Kokum butter — excellent nourish and anti-oxidant property, idea lip care ingredients</p> <p>Cirebelle 109L — high melt wax, suitable for lip care</p>	<p>Alzo</p> <p>Biochemica</p> <p>Cirebelle</p>
Filling agent	<p>Jurymer MB series — PMMA , perfectly spherical ultra-refine particles. Colorless and transparent with good flowability and lubricity. Excellent chemical resistance:</p> <p>Jurymer MB-S — polymethyl methacrylate, average particle 4.0~6.0μm</p> <p>Jurymer MB-1 — polymethyl methacrylate, average particle 6.0~10.0μm</p> <p>Jurymer MB-20 — polymethyl methacrylate, average particle 15.0~20.0μm</p>	Nihon Junyaku
Film forming ingredients	<p>Jurymer AT-515 — copolymer of polyacrylate , solid conten 28.5~31.5 , forms a medium-hard film, can be applied to mask, eye shadow, eye black etc.</p> <p>Jurymer AT-510 — copolymer of polyacrylate , solid conten 28.5~31.5 , forms a medium-hard film, used in mask and other color cosmetics</p> <p>Jurymer ET-410 — copolymer of polyacrylate , solid content 28.5~31.5 , mixed well with varies pigments, water resistance</p>	Nihon Junyaku
