

BENTONE® LUXE WN

INCI Name: Capric/Caprylic Triglyceride (and) Stearalkonium Hectorite (and) Polyglyceryl-3 Diisostearate (and) Polyglyceryl-3 Polyricinoleate

BENTONE® LUXE WN joins the versatile BENTONE®LUXE product line of multi-functional clay-based emulsifying gels.

BENTONE® LUXE WN is globally approved, 98% natural origin¹ and vegan. With this one ingredient, it is possible to formulate stable water-in-oil emulsions with textures ranging from watery thin lotions to luxuriously thick creams. **BENTONE® LUXE WN** is cold process-able and enables the formulator to create high water-containing emulsions with quick break and hydrating sensation.

BENTONE® LUXE WN can be also be used in color cosmetics and sunscreens to disperse and suspend pigments and inorganic sunscreen actives.

Features and Benefits

Easy to use and cold process-able—saves time and energy

Multi-functional— formulation simplification

Formulation flexibility—create light to rich emulsions

Elegant aesthetics—improves feel even in high oil systems

Globally approved—allows for global chassis development

98% natural and vegan—perfect for natural and clean formulation

Effect of Water Content
