

Liebert MicroPOD™ Maintenance Bypass for Micro-UPS Systems

When your computer system can't be without power — even for maintenance — a Liebert MicroPOD ensures continuous uptime. The MicroPOD provides maintenance bypass capability as well as power output distribution, and can be used with virtually any micro-UPS system.

The MicroPOD allows you to manually transfer your connected equipment to utility power via a maintenance bypass switch, permitting scheduled maintenance or UPS replacement without power disruption. Transferring back to UPS power is just as easy — just turn the switch to the indicated position and your load is protected by the UPS.

Available in plug and play or hard wired options at 120V or 208V rating. Includes brackets for rack mounting in any direction.

Use of the MicroPOD offers these benefits:

- Provides utility power to your attached equipment when switched to maintenance bypass mode
- Allows UPS maintenance or replacement of the UPS without discontinuing power to critical equipment
- Easily installed — the UPS and utility power are both connected to the MicroPOD with the supplied cords
- Rotary switch with indicators make the unit simple to operate

MicroPOD™ Specifications

Part Number	Plug to Utility	Receptacle to UPS Input	Plug to UPS Output	MicroPOD Output Receptacles
120V UL Listed MicroPODs				
MP2-115A	5-15P	5-15R	5-15P	(8) 5-15R
