

PASCAL-MAXX

Reliable long-term measurements in the medium pressure range

DIFFERENTIAL PRESSURE-MEASUREMENT

QUICK FACTS

PASCAL-MAXX

Robust transmitter with large display for HVAC applications

Differential pressure measuring instrument with large display and automatic zero-point calibration for the monitoring of room pressure and filter saturation. The device disposes of a scalable analogue output as well as an integrated alarm switch contact.

ADVANTAGES & BENEFIT

ROBUST, EASY TO READ, LONG-TERM STABLE, MAINTENANCE-FREE

The instrument design is adapted to HVAC applications and is appropriately robust. The automatic zero-point calibration allows a maintenance-free operation and drift-free measuring. Besides a long life-time this instruments excels with an extra-large and easy to read display, also from greater distances.

FEATURES

- ROBUST HOUSING
- EXTRA-LARGE DISPLAY
- SENSOR WITH DUST PROTECTION
- AUTOMATIC ZERO-POINT CALIBRATION
- LONG-TERM STABLE
- ANALOGUE OUTPUT & SWITCH CONTACT
- MENU WITH KEYLOCK OPTION
- CALIBRATION & CONFIGURATION BY INSTRUMENT KEYPAD

AREA OF APPLICATIONS

HEATING VENTILATION AIR CONDITIONING IN VARIOUS INDUSTRIES

FILTER MONITORING

FAN MONITORING
