

CALIBOX 200

Pressure generator and reference for on-site calibration of low pressures

DIFFERENTIAL PRESSURE- MEASUREMENT

QUICK FACTS

CALIBOX 200

Mobile pressure generator and reference for calibration of static and dynamic differential pressure sensors

Robust case for differential pressure calibration. The versatile CaliBox is a pressure generator and a reference instrument too. It can be used for all types of differential pressure instruments, with membrane or mass flow sensors.

ADVANTAGES & BENEFIT

BATTERY POWERED, FOR ALL SENSOR TYPES, SUITABLE AS PRESSURE REFERENCE

Thanks to a steady and continuous pressure generation all types of sensors, if membrane or mass flow ones can be connected and calibrated and it's unnecessary to buy an additional reference device. The built-in battery has a long operation time and allows a flexible use on-site without any muddled cables. The case is easily and quickly ready for use and stowed again.

FEATURES

- ROBUST CASE HOUSING
- GENERATOR AND REFERENCE IN ONE DEVICE
- BATTERY POWERED
- FOR USE WITH MEMBRANE & MASSFLOW SENSORS
- AUTOMATIC ZERO-POINT CALIBRATION
- INCLUDING 11-POINTS FACTORY CALIBRATION CERTIFICATE
- POSSIBLE TO GET IT WITH ACCREDITATION

AREA OF APPLICATIONS

- CLEAN ROOMS - VERIFICATION & CALIBRATION
- HVAC (HEATING, VENTILATION, AIR CONDITIONNING)
- MOBILE CALIBRATION LABS
- TEST EQUIPMENTS
- AND MORE...
