

LabPRO Pipet Controller

LabPRO products are specially designed to offer high performance with Swiss accuracy yet with economical value. The LabPRO Pipet Controller is a lightweight and ergonomic unit for use with plastic or glass pipettes from 0.1 to 100 mL. Its balanced design and contoured buttons help prevent hand fatigue even after hours of use. In addition, the speed and battery displays make pipetting easy!

Two distribution modes:

Distribution speed adapts to the need of the scientist: Drop by drop to blow out

Optimum speed control:

Aspiration and dispense volume can be set up with both pressure sensitive trigger and thumbwheel

LCD Screen:

Information about battery and the aspiration/dispense speed of the pipet controller

Lithium-Ion battery:

More modern, longer use, and reduced charging time

Multiple stands:

The side stand, charging desk stand and a wall mount included

Specifications

For all plastic and glass serological pipettes from **1 to 100 mL**
